Multi-entity corporate group

CHALLENGES

- Large UAE groups face increasing complexity in corporate tax compliance across multiple operating companies with mixed mainland and free-zone structures.
- Tax teams need to monitor exposure and liabilities, identify savings, detect compliance risks, prepare executive-grade tax memos, and answer ad-hoc requests from leadership quickly.
- The current process is heavily manual and relies on fragmented data.

APPROACH

A portfolio monitor gives a real-time view of group corporate tax exposure, projected liabilities and entity-level savings opportunities.

A legal retrieval and explanation agent works from UAE Corporate Tax rules and a curated legal corpus, so that every answer carries a clear explanation and a full audit trail.

BENEFITS

- Portfolio Monitor — group exposure, projected liabilities and savings in real time
- Legal Retrieval & Explanation Agent — answers grounded in the curated legal corpus
- Scenario Simulator — restructuring options modeled, compliance and scenario memos generated
- Ask the Tax Agent — Q&A for CFOs and finance teams on entity-level questions
- Full audit trail behind every answer
